STOP KILLING

THE PLANET

Use The Alternatives

NUCLEAR ENERGY

5th largest energy source of India

India has: 22 nuclear reactors & 6780 MW installed power capacity (as of November 2020)

SOLAR ENERGY

India has 39083 MW of installed power capacity (as in 29 February, 2021)

India on average has 300 sunny days

Covering 1% of Earth's surface around equator can generate enough power for the world!!

WIND ENERGY

1st of total energy produced in India

India has 38789 GW of installed power capacity (as in 28 February, 2021)

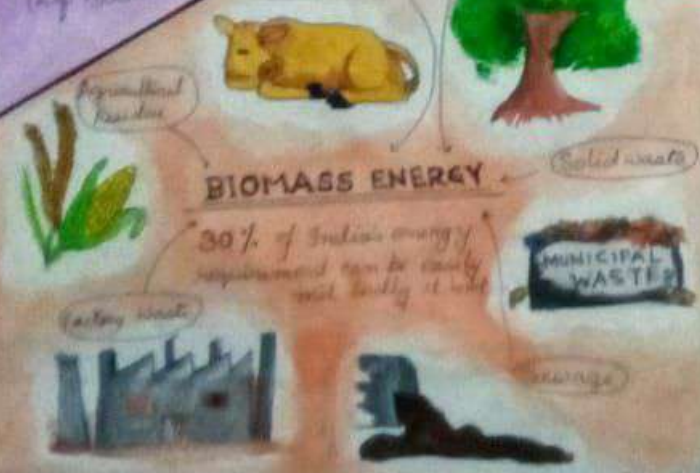

HYDRO ENERGY

India has: 148700 MW of installed power capacity (as of fiscal year 2019-20)

BIOMASS ENERGY

30% of India's energy requirement can be easily met using it well

GEO-THERMAL ENERGY

India has: More than 3000 potential geothermal sites & 10000 MW of potential installed energy (as of 20)

WORLD ENVIRONMENT DAY

ABIG SALUTE TO THEM.

Our planet is precious and only we can save it.

COVID-19

Corona become global pandemic and every country of the world is affected due to Corona virus. Many countries announced toughed lockdown to avoid spreading of Coronavirus. Daily infected patient and the death toll is increasing. Government taking aggressive action to control the corona spreading. We should saluting the Doctors, Nurse, health & social workers despite the crisis and risk of their own life. Let's check a lot of salute and appreciation to Corona warriors.

We are part of the world we are destroying.

Human beings often forget that we are largely dependant on Mother Nature and become ignorant towards taking care of it. We have been so negligent to the preservation of natural resources and sustainable development that we had forgotten the beauty of the Earth completely.

The covid-19 lockdown imposed throughout the world has struck a chord in every one of us and it has made us thinking how nature is so important for our day to day living. The tangible improvements in nature have made us believe that the earth can be saved.

It has made us see that our actions can very well impact the Earth's sustainability. For breathing pure air to grow new trees, spitting various waste into the streets here are some important environmental changes that we have seen for corona virus lockdown in India.

SAVE EARTH SAVE LIFE

“বন্যেরা বনে সুন্দর
কিন্তু মাছগুলো
— অজুগীবচন্দ্র চট্টোপাধ্যায়

স্বাচ্ছন্দ্য ন্যাসাও

স্বাচ্ছন্দ্য বাঁচাও

RECYCLE AND SAVE EARTH

DO NOT CUT TREES
RATHER PLANT

STOP DEFORESTATION

STOP THE EARTH
FROM BURNING

CONSERVE
WATER
SAVE PLANTS

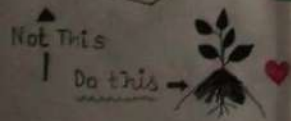

Environment is very strict. So if human harm her,
She will surely take revenge.

LIVE AND LET LIVE

Don't kill them.
They are the reason
of lives.

HUMAN IS THE DESTROYER OF
THE ENVIRONMENT

A Tsunami, a flood,
an earthquake, a cyclone
can destroy a civilization.
So stop harming the
environment.

Great human should be
furnished.
